Madame Loco

"Madame Loco". A name that strikes fear in the hearts of all in Madichon, a small island of humans full of deep swamps in the middle of nowhere. Once worshiped as a loa of healing and a bringer of life, but has since shifted into a cold hard killer. Unbeknownst to the mortals, their loa has been long dead, slain at the hand of a powerful voodoo sorceress, claiming his name. Centuries have passed and she now reigns over Madichon, bringing terror to its inhabitants. None of the villagers have ever come face to face with her, and some even doubt her existence. What they do know, however, is that if they do not leave sufficient offerings for her they will begin to fall ill. Some still say that this is a coincidence and that she is not real, though those who do believe in her, have faith that leaving her these sacrifices will protect them from her wrath. Unfortunately, they also believe that these offerings will guide them a safe passage into the afterlife, which is not the case. Upon death, Madame Loco claims the lost souls of the islanders of Madichon and saves them to use in her powerful voodoo.
